

Prashant Jha

Mumbai, India

+91 9167260747 — pkj0446@gmail.com — [LinkedIn](#) — [GitHub](#)

Profile

AI & ML Engineering student with strong foundations in Python, machine learning, and system design. Experienced in building AI-driven applications, multi-stage pipelines, and scalable solutions across healthcare and intelligent systems.

Skills

Languages: Python, C, C++, Dart, JavaScript
AI/ML: TF-IDF, SBERT, Ensemble Models (SVM, LR, RF), Feature Engineering
AI Systems: Gemini API, RAG, Multi-stage AI Pipelines
Development: React, Next.js, Flutter, HTML, CSS
Backend/DB: FastAPI, Firebase, SQL
Tools: Git, GitHub, VS Code, Colab, Zod, Docker

Projects

- MediLocker — AI Medical Records Vault** [GitHub](#)
- Built secure cross-platform system using Flutter and Firebase.
 - Implemented AES-256 encryption and AI-based summaries (Gemini).
- AI Forge — Software Generation Compiler** [GitHub](#)
- Developed multi-stage AI pipeline converting natural language into applications.
 - Implemented schema validation and repair using Zod.
- TaskFlow — Full-Stack Task Management App** [GitHub](#)
- Built cross-platform task management app using Flutter, Firebase, and REST APIs.
 - Implemented real-time CRUD operations, Firebase authentication, and reactive state management.
- TruthLens — Fake News Detection System** [GitHub](#)
- Built ML system using TF-IDF, embeddings, and ensemble models.
 - Integrated RAG verification and bias-aware pipeline.
- AI Builder UI Prototype** [GitHub](#)
- Built interactive frontend using React + Vite.
 - Implemented dynamic UI states and edge-case handling.

Education

Bachelor of Engineering in Artificial Intelligence & Machine Learning
St. Francis Institute of Technology, Mumbai
Currently in Semester IV

Leadership & Activities

- Technical Executive — ISTE**
- Organized technical events and coordinated execution.
- Internship Coordinator — IIC**
- Managed internship awareness and student engagement initiatives.
- Joint Head of Security — Student Council**
- Led security operations and coordination for large-scale events.
